

FORSBERG

Leaders in Separation Technology

3-Deck Series Screen Separators

The Forsberg 3-Screen Separator is a positive eccentric, high-speed, vibrating screener which ensures accurate, high capacity and high quality separations. Shown is Model 510 Screener.

Standard Features:

The Forsberg 3-Deck Screen Separators are the four-bearing type. By incorporating outboard bearings mounted in an isolation housing and inboard bearings mounted in screener body, a positive eccentricity motion is achieved regardless of load on the screen.

- The outboard bearing isolation mounts, combined with the unique counter-balancing system makes the fram virtually vibration free.
- Easy screen removal! Any of the three screens can be changed without loosening the adjacent one. The screen support grids require no holddowns.
- The ball compartments are incorporated into the screen support grids for addition of ball cleaners, if required.
- Adjustable feed hopper assures consistent supply of product onto the screener. Byu maintaining proper feed, you can achieve the best separation possible.

AVAILABLE MODELS

MODEL	SCREEN SIZE	HORSEPOWER
510	60" X 120"	5
57	60" X 84"	5
47	48" X 84"	5
37	36" X 84"	5

* Also available with pre-scalp, pre-ari, and post aspiration.
