

Westrup Precision Air/Screen Cleaners

The New Westrup UB Series Precision Air/Screen Cleaner

Westrup is proud to introduce the new UB Series Precision Cleaners with screen widths of 600 mm (24"), 1000 mm (39"), 1250 mm (49"), and 1500 mm (59") depending on the capacity you require. The UB 1500 is rated up to 210 bph (5.7 mph) for precision seed cleaning on wheat. The smaller width UB 600 and UB 1000 are excellent machines for foundation seed cleaning or for flower and vegetable seed.

The UB Flow includes one short pre-scalping screen followed by a 94" long main scalping screen layer and a 94" long sifting screen layer.

Westrup UB: With two 94" long screen layers and a highly efficient air system, it is the perfect machine for precision seed conditioning operations.

The UB-Series Main Features

The UB standard machine features include:

- Custom steel channel frame with main shoe: with one short and two main screen layers. Also with laminated fiberglass shoe hanger springs and beveled screen tracks for easy clean outs.
- 6.4" diameter steel feed roll with mechanically variable speed and adjustable feed gate with brush seal
- Air system with pre-aspiration, final air column, two air settling chambers with right side discharge cull conveyors, false air valve and calibrated air valve controls and top mounted fan.

Westrup Optional Features

The UB can be equipped with the following options:

- Vibrating feeder with adjustable control
- Quick change screen access doors
- Rise air screen in the final air column
- Electronic air valve controls
- Adjustable stroke length eccentric bearings
- Inverter drives for eccentric and feed roll
- Intermediate pulley for slow feed roll rpm

Reduced feed roll rpm: In cases where customers would like to slow down the feed roll speed using the mechanical drive, the machine can be constructed with an intermediate pulley for 2-7 rpm on the feed roll. This is especially useful for flower and vegetable seed conditioning. (drive guard removed for illustration)

Your new machine will be backed by the world's leading manufacturer of seed conditioning equipment. Over the past 40 years we have installed our machines in more than 100 countries. Our machines are known for their **flexibility, accuracy and reliability.**

**HAND IT OVER TO WESTRUP, YOUR
WORLDWIDE INNOVATOR IN SEED
CONDITIONING.**
