

# Form Vibrators

## Portable Quick Clamp Vibrator

The **NAVCO**<sup>®</sup> Quick Clamp FV is a portable clamp on vibrator. FVs are of one-piece construction design. Equipped with it's own built-in clamp, the FV eliminates the need for special mounting brackets often required by other portable models.

### Applications:

The **NAVCO**<sup>®</sup> FV is often used on concrete forms to eliminate porosity.

In foundries, the FV gives fast, clean draws – this extends core box life by eliminating distortion.

The FV is ideal for any industrial application where a clamp-on portable is preferred over a permanently mounted vibrator.

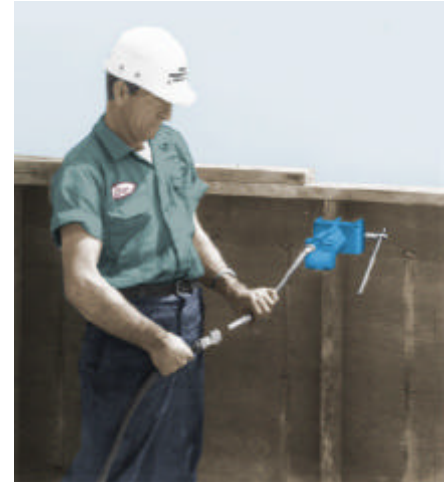

### Benefits:

- Eliminates Porosity in concrete forms
- Easily clamps to most structures with vice-grip type clamp
- Completely portable, move the FV as needed
- Vibration frequency is easily controlled by adjusting the air supply from 20 to 60 psi.

### Dimensions:

The FV comes in 2 sizes:

Piston Diameter	Length	Weight	Jaw Opening Size
FV 1- ¼"	8 - ½"	12 ½ lbs.	2 – ? "
FV 2"	9 - ½"	22 lbs.	3 – ½"
