

## Pneumatic Vibratory Feeders

NAVCO® designs and manufactures many types of pneumatic vibratory feeders and conveyors. Vibratory feeders can be a preferred method of feeding dry bulk materials, especially in explosion proof environments where electrically operated feeders are prohibited. NAVCO®'s own quality pneumatic piston vibrators are utilized as the vibratory drive mechanism on the pneumatic feeders.

Pneumatic tube conveyor

NAVCO® feeders are engineered to order so there are many different sizes and options available. From small dosing feeders with integrated hopper packages to heavy-duty trough feeders and large tube conveyors, NAVCO® can meet the requirements.

Small feeders with vertical and horizontal discharge and food grade stainless steel troughs

Pneumatic vibratory feeders are very versatile, from small dosing and batching jobs to many tons per hour applications.

Pneumatic dosing feeder with integrated hopper package

### Features Include:

- All pneumatic
- Inherently safe operation, explosion proof
- Engineered to order
- Feed rate adjustability via air pressure regulation
- Instant On/Off for precise batching control
- Vertical or horizontal discharge
- Wide range of feeding capacities
- Integrated hoppers and portable stands are available
- Food grade available

**Ideal for explosion proof environments.**
