VIBRATORY CONVEYORS

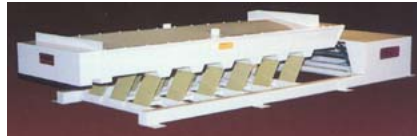

The New Line of Forsberg Vibrating Pan Conveyors

Forsberg Conveyors feature a *transient oscillating suspension* coupled with an exciter drive system which allows maximum efficiency and durability. This produces a motion that moves the material gently without hindrance or repression, keeping abrasion or breakage to a minimum. Manufactured out of carbon or stainless steel, to suit your conveying needs.

Choose from our light or heavy-duty standard models, or our Engineering Department can design a model customized for you.

CONVEYING ACCESSORIES AVAILABLE

- SCREENING
- PRODUCT DISCHARGE MANIFOLDS
- COVERS, ETC.
- AIR EXHAUST PORTS
- DIVIDERS (HORIZONTAL OR VERTICAL)
- DeWATERING
